

Supplies Needed to Make a Handprint Flower for Mother's Day

- Cardstock – green, brown and white or you can use construction paper
- Pink and purple paint
- Sticker gems
- Black Sharpie or Marker

Directions to Make Your Mother's Day Handprint Flower Card

1. First start by tracing your handprint on green paper. You can also do a handprint with paint too!

2. Now draw and cut out two flower pots that would fit to size under your handprint. You can draw one and use it to trace the second one so that they are the same size.

3. To make your fingerprint flowers, paint or dip any finger and make 6 petals on each flower. We did 3 pink flowers and 2 purple flowers.

4. Glue your handprint and flowerpot to white cardstock.

Fold one of your flowerpots at the top (so it will open up) and glue on top of the other flower pot.

Cut out your fingerprint flowers and glue on sticker gems for the centre of the petal.

5. Now write your message inside your card.
